

Senior Specialty Jazz- Tainted Love
300- Siam AB 20ss

- I placed a cutting board inside the costume when working on the mesh top to keep the glue from sticking to the other parts of the costume.
- The mirror pieces fall off easily, if they do come off you can glue them back with some E6000. Let your dancer know to be careful when talking it on and off on comp days!
- Pattern was made off Adult Medium costume, you may have to adjust spacing/amount of stones based on your costume size.

Step 1: Bodice- Sequin Lines (front and back of costume) - approximately 100 stones
Place Siam AB stones on the intersecting points of the sequin lines.
Continue this on the backside of costume on the sequin lines.

Step 2: Back Straps- approximately 40 stones

On all straps on back of costume, place Siam AB stone 1 and ½ inches apart. Pay attention to not placing stones where straps crisscross each other.

- This worked best having 2 people, one person placing stones and one holding the straps as they do not lay very smoothly.

Step 3: Belt- approximately 20 stones

Place Siam AB stone 1 and ½ inches around the mid-seam of costume

Step 4: Mirror Sections on legs (front and back)- approximately 100 stones

Use remaining stones to scatter Siam AB stones in between mirror pieces on front and back of costume

I used around 25 on each section (front right, back right, front left, back left). The amount will vary based on costume size.
