

Teen Jazz Rhinestone Pattern

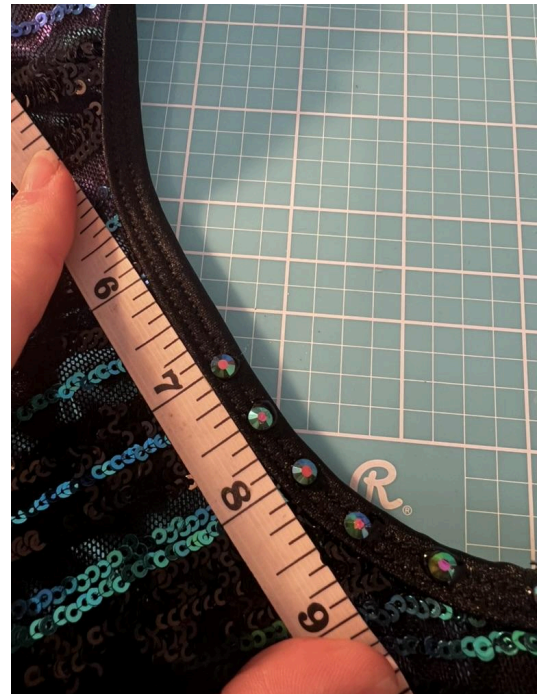

- Peacock Green 20ss Rhinestones
- The pattern was based on costume size: Small Adult.
- If additional rhinestones are needed, please contact the team. All that were bought for this pattern/costume were distributed to the team.

- **Tips:** Please use all measurements as guidelines and lay a few out before gluing.
 - *Reminder that rhinestoning is a marathon, not a sprint. You may only do a few inches and need to let dry and come back. Please keep all materials and costumes in a safe/clean area while working and drying.*
- Please see the Families page on the Studio website for more tips/tricks and list of recommended supplies for rhinestoning.

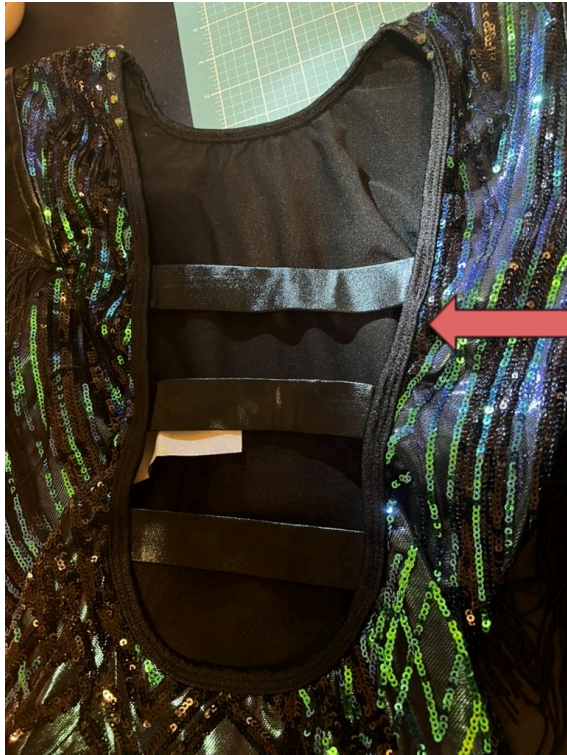

Front of Costume:

- Top Black Edging/Collar of leo
 - glue one stone, every 1/2 inch across the top

Back of Costume:

- Continue down the back of Black Edging of leo:
 - glue one stone, every 1/2 inch to complete the loop to front.

Black border w/out rhinestone (left) and with (right).
Ignore the middle straps for this step.

Back of Costume, Continued:

3 straps across the mid-back, the goal is to have two straight lines of rhinestones.

All Three Straps should follow the same spacing guidelines:

- Top row spacing, place roughly $\frac{1}{4}$ inch apart, in a straight line
- Second row starts $\frac{1}{2}$ inch in and spaced roughly $\frac{1}{4}$ inch apart, in a straight line, should end $\frac{1}{2}$ inch out.

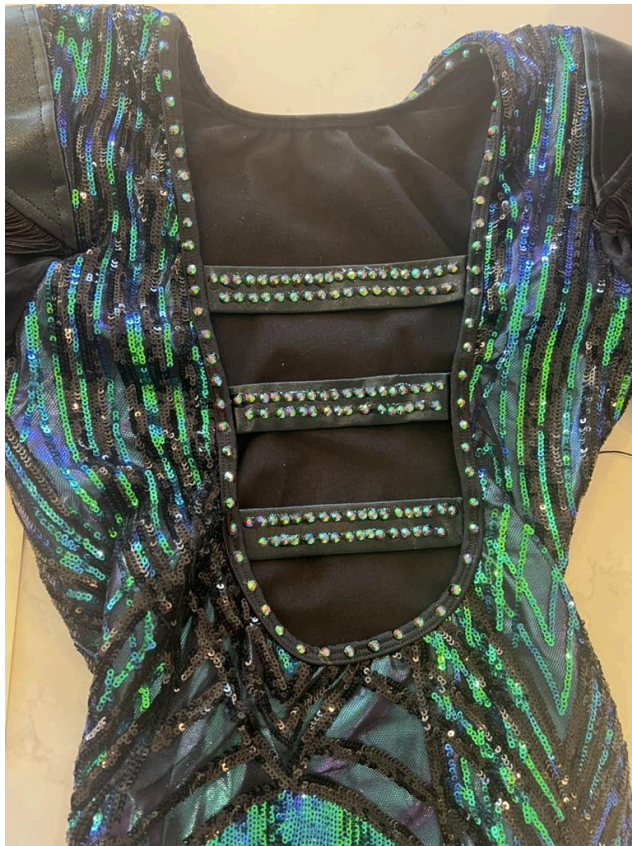

Example below:

Recommendation: Measure the straps and count the number of rhinestones needed per strap and per row before gluing.

Here is the guideline I used for the Small Adult size:

- Top most strap: 5 1/2 inches long:
 - Top row of stones: roughly 22 stones
 - Second row starting 1/2 inch in from top row: 20 stones
- Middle & Bottom strap: 4 1/2 inches long:
 - Top row of stones: roughly 18 stones
 - Second row starting 1/2 inch in from top row: 16 stones

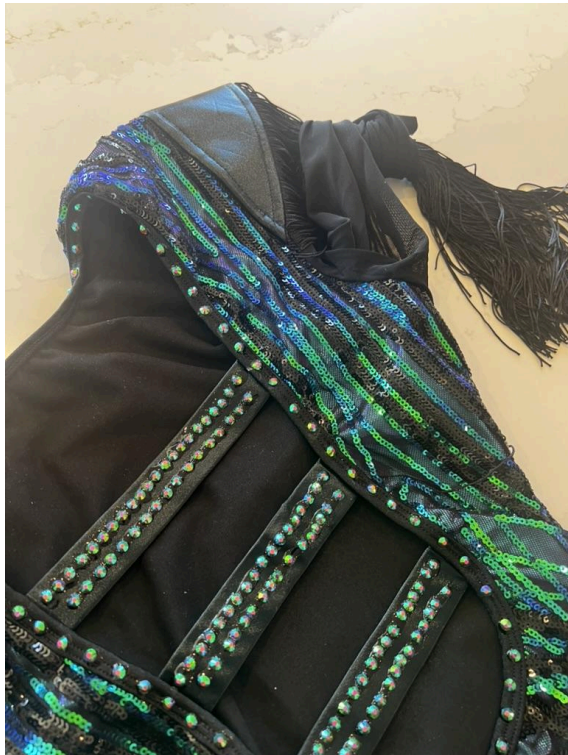

This part took the longest, and had to be done in sections of glue and let dry.

Shoulder Cuffs:

A single line of rhinestones will be placed along the fringed line of the black pleather-like Shoulder Cuff.

Recommendations:

- *Gently tie or somehow protect the sleeves and fringe from the glue before starting.*

- *Complete the front and let dry overnight before starting the back.*

To rhinestone: place a total of 52 stones per arm, roughly $\frac{1}{4}$ inch apart on the seam line next to the fringe of the black-pleather cuff, front and back. Both arms.
